WORK EXPERIENCE

Associate Software Engineer

Think and Learn Private Limited - BYJUS

01/2022 - 12/2022

Bangalore, India

Payment Management system (PTMS), Finance Management System (FMS).

Responsibilities

- Developed grid-based UI to track the financial aspects of loans and payments.
- Collaborated with different payment partners (Razorpay, Gpay) for payment reconciliation flow through payment partner API. 1000 of payments are reconciled on daily basis that reduced the manual work and increased the efficiency of the team by a lot.
- Created feature where report can be scheduled on monthly basis which was used by sales team for analysis purpose.
- Worked on microservices where i had to relay on other microservices for data.
- Performed unit testing for Gpay payment integration and took responsibility for adding new features.

Procurement Engineer

Crescent Oasis Technical Services LLC

10/2019 - 12/2021

Dubai, United Arab Emirates

Achievements/Tasks

- Implemented the new design and innovative things under the direction of senior managers
- Worked closely with project managers and engineers to ensure project needs were fulfilled and budget were honoured
- Assisted with identifying projected costs and assembly specifics
